

## On Entering

Using the light switch just inside the Main Hall on the left of the doors turn on the front section of the Main Hall lights, lighting you onto the stage

On the stage (stage right) turn on the remaining Main Hall lights and the destratification fans, turn on the lights on the stage as required

Note the destratification fans do not cause a draft but do move warm air down speeding up the heating of the hall and reducing the energy needed to heat the hall

Dim Main Hall lights as required - see overleaf

## On Leaving

Make sure the fire escape is closed and bolted

On the stage turn off the destratification fans

Turn off two sections of the Main Hall lights leaving the set nearest the stage on

Turn off the lights on the stage

Leave the Main Hall, checking that the kitchen lights are off

Turn off the Main Hall lights by the door to the extension

## SCHOOL ROOM AND NEW BAR

The light switch in the School Room and the New Bar is different from the previous type.

### **To switch the lights on and off**

'Press and Release' the switch to turn the lights ON and 'Press and Release' again to turn the lights OFF

The System is also dimmable and will remain in the state last used when switched off

### **To change the level of dimming**

'Press and hold' the light switch. The lights will come on and either dim or brighten depending on how they were last left, and they will continue to change for as long as you hold the switch pressed

Allow the light to fully dim or brighten. IF you want to change this state, then release the switch and 'Press and Hold' again to allow the brightness to change in the other direction

To turn the lights off 'Press and Release' the switch
